### **DETAILED ACTION**

Claims 1, 7-21, 29-50 are pending. Claims 34-50 are withdrawn as being directed to a non-elected invention. Claims 1,7-21,29-33 have been considered on the merits herein.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7, 8, 10, 18, 19, 20, 21 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/74164 A1.

WO '164 teaches a method comprising culturing dermal papilla (DP) cells with cells expressing Wnt proteins to promote hair growth. The culturing of DP cells with Wnt maintains hair inductivity (p.1, lines 17-19). The Wnt expressing cells can be autologous or allogeneic to the DP cells (p.3, lines 11-17). The method comprises culturing DP cells to increase the number of DP cells, i.e. three or more passages (p.14, lines 1-2,26-28, p.23, lines 1-14) and then harvesting and returning the cells (p.14, lines 15-23). They also teach that the cells can be autologous or allogeneic (p. 3, lines 11-13).

The claims have been interpreted as a product by process in that the medium conditioned by prostate epithelial cells does not necessarily contain the prostate cells themselves but a product of such cells, i.e. Wnt proteins, which is the critical element in the medium which maintains hair inductive potential of hair inductive cells. The medium of the instant application is embraced by the medium in the above reference.

The patentability of a product does not depend on its method of production. If the claimed product is the same or obvious from a product in the prior art (i.e. the product disclosed in the cited reference), the claim is unpatentable even though the reference product was made by a different process. When the prior art discloses a product which reasonably appears to be identical with or slightly different than the claimed product-by-process, rejections under 35 U.S.C 102 and/or 35 U.S.C 103 are proper. (MPEP 2113)

Thus, the reference anticipates the claimed subject matter.

#### ***Allowable Subject Matter***

Claims 9, 11-17, 29-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
